

Position title: **Ultrasound Technologist (Full Time)**

Location: Toronto, Ontario

Status: Permanent full time

Reports to: Ultrasound Supervisor

About the company

Founded in 2016, Anova Fertility & Reproductive Health is the newest health centre in Canada exclusively focused on reproductive medicine and women's health. Anova Fertility and Reproductive Health is the leader in innovation, education and communication for high quality, humanized fertility and reproductive care. We are the international standard for successful reproductive health and fertility centres that are committed to making the right to family accessible to everyone. We are known for our culture of support, our effective process and our holistic approach to patient care. By doing what we love, sharing what we learn and celebrating success, we encourage each other to achieve and grow, and we are role models for our community.

About the position

As an Ultrasound Technologist, you will establish and maintain collaborative relationships within and outside the Ultrasound Department. Reporting to the Ultrasound Supervisor, this position performs and will be fully proficient in all ultrasound procedures associated with the diagnostic and therapeutic treatment services provided by Anova Fertility & Reproductive Health. You will ensure that data and documentation are accessible, accurate and filed correctly. Crucially, you will share management's passion for being the international standard for successful reproductive health and fertility centres and for making the right to family accessible to everyone.

Major Responsibilities

- Support Clinic by providing quality service to patients in friendly and calm manner
- Perform high-quality ultrasound studies, adhering to established standards
- Perform complete female assessments and assist specialists
- Ensure proper set-up of ultrasound equipment to produce optimal visualization
- Perform audits of equipment to ensure that this functions correctly
- Assist with maintenance of ultrasound equipment and cleaning of ultrasound rooms
- Record ultrasound findings in sonographer report and provide initial interpretation

- Ensure that records are current, correct, complete, legible and traceable
- Comply with safety and security procedures and use equipment in prescribed manner
- Maintain strict confidentiality and security of records and patient information

Qualifications and Requirements

- Successful completion of ultrasound training program
- At least 2 years of relevant experience, including scanning all stages of pregnancy
- Current registration with ARDMS and/or Sonography Canada-credentialed membership
- Familiar with color doppler, sonohysterography 3-dimensional ultrasound and infertility
- Able to work flexibly, including rotation in weekend and statutory holiday schedule
- Able to discuss complex topics with patients and check for understanding
- Track record of punctual attendance and schedule adherence
- Strong communication and interpersonal skills
- Thoroughness and keen attention to detail

Personal Profile

- Sincere interest in helping people
- Empathy and strong customer service orientation
- Comfortable working in team environment
- Conscientious, punctual and dependable
- Friendly, calm, welcoming demeanour
- Responsive to changing priorities
- Professional and positive attitude

How to apply:

If you are interested in joining a growing organization that is passionate about being the international standard for successful reproductive health and fertility centres, please send your resume and cover letter to careers@anovafertility.com. We thank all applicants for their interest, however only those selected for an interview will be contacted.
