Sunday News

Morning edition

VIBRANT **INCLUSIVE** **PROGRESSIVE**

I have been a member of MCC Toronto since 2001.

My education includes being a graduate of

the McGill University's School of Medicine, with postgraduate training in Obstetrics and Gynecology at the University of Toronto. My passion and faith led me to pursue a career in reproductive medicine, completing a 3-year subspecialty at the American Board of Obstetrics and Gynecology accredited fellowship in Reproductive Endocrinology and Infertility.

I am committed to making the right to family accessible to everyone.

I feel a kinship with this church's beliefs, as the "all are welcome" and "welcome home" mantras align with

my ideals as a reproductive specialist and as a parent.

Conversations with all of you continue to open my eyes to the belief that many barriers still exist for people who have a desire to grow their families. My advice is that many of the barriers are perceived, and not real. The province of Ontario has accessible and available resources that will allow all to successfully grow their family. Great advances have been made in the technology and in options (such as gestational surrogacy, reciprocal IVF, etc.), and the best news is that **it's all right here in Toronto!**

I truly appreciate that all families, regardless of the configuration, worship together harmoniously and lovingly here, which makes MCC Toronto feel like home.

Dr. Marjorie Dixon

Happy Family Day!
